

## ABSTRAK

Clitus Marselinus Hausufa, 18.75.6313. *Dampak Pandemi Covid-19 Terhadap Proses Pendidikan Anak di SDK Wairpelit*. Program Sarjana, Program Studi Teologi –Filsafat Agama Katolik, Sekolah Tinggi Filsafat Katolik Ledalero. 2021.

Penulisan skripsi ini bertujuan untuk: (1) menjelaskan tentang pandemi covid-19 dan bahaya penularannya, (2) mendeskripsikan tentang kegiatan belajar mengajar di SDK Wairpelit selama masa pandemi covid-19 dan melihat dampak pandemi covid-19 terhadap proses pendidikan anak di SDK Wairpelit, (3) menemukan langkah praktis dari para guru untuk membantu kegiatan belajar mengajar selama masa pandemi.

Metode yang digunakan dalam penulisan skripsi ini adalah metode penelitian lapangan dan metode penelitian kepustakaan. Metode penelitian lapangan dibuat dengan mengadakan wawancara: dengan guru di SDK Wairpelit, orang tua/wali peserta didik, tokoh masyarakat, dan tokoh adat serta dengan memberikan pertanyaan kuisioner kepada peserta didik. Metode penelitian kepustakaan diperoleh melalui buku, jurnal, diktat kuliah, artikel-artikel ilmiah, dan sumber tertulis lainnya dalam penulisan karya ilmiah ini.

Berdasarkan hasil analisis dari dua metode penelitian di atas, disimpulkan bahwa proses pendidikan yang terjadi di SDK Wairpelit selama masa pandemi covid-19 tidak berjalan dengan maksimal. Peserta didik cukup mengalami kesulitan dalam menyesuaikan diri dengan model pembelajaran baru yang diterapkan oleh pemerintah. Model pembelajaran baru tersebut mewajibkan peserta didik untuk melakukan pembelajaran dari rumah dengan mengerjakan tugas-tugas yang diberikan oleh guru. Tugas yang diberikan oleh guru tidak sepenuhnya dipahami oleh peserta didik karena waktu yang digunakan untuk bertatap muka dengan mereka (peserta didik) sangat singkat atau terbatas sehingga peserta didik hanya dapat mengerjakan tugas dengan pemahaman yang terbatas. Oleh karena itu, bimbingan dan pendampingan dari orang tua/wali terhadap peserta didik di rumah sangat diperlukan karena dapat membantu mereka (peserta didik) untuk memahami materi atau tugas dari guru dengan baik. Dengan demikian, penulisan skripsi ini menegaskan pentingnya kerja sama yang baik bagi *stake holders* dalam dunia pendidikan untuk kemajuan anak bangsa.

**Kata Kunci:** Pandemi Covid-19, SDK Wairpelit, Pendidikan, Peserta didik, Sekolah, dan Aspek-aspek perkembangan anak.

## ABSTRACT

Clitus Marselinus Hausufa, 18.75.6313. *The Impact of the Covid-19 Pandemic on the Children's Education Process at the Wairpelit Elementary School (WES)*. Undergraduate Program, Philosophical and Theological Studies Program of Catholic Religion, Catholic Institute of Philosophy of Ledalero. 2021.

The purpose of this undergraduate thesis are to: (1) explain the covid-19 pandemic and the dangers of its transmission, (2) describe teaching and learning activities at the *WES* during the covid-19 pandemic and see the impact of the covid-19 pandemic on the children's education process at the *WES*. , (3) find practical steps from teachers to help teaching and learning activities during the pandemic.

The method that is used in writing this undergraduate thesis is a field research method and a library research method. The field research method was made by conducting interviews: with teachers at the *WES*, parents/guardians of students, community leaders, and traditional leaders as well as by giving questionnaire questions to students. The library research method was obtained through books, journals, lectures, scientific articles, and other written sources in the writing of this scientific paper.

Based on the results of the analysis of the two research methods above, it is concluded that the educational process that took place at the *WES* during the COVID-19 pandemic did not run well. Students were quite difficult to adjust to the new learning model implemented by the government. The new learning model pushed students to do learning from home by doing the tasks given by the teacher. The assignments given by the teacher were not fully understood by the students because the time that was used to meet face to face with them (students) is very short or limited, that students could only do assignments with a limited understanding. Therefore, guidance and assistance from parents/guardians towards students at home was very necessary because it helped them (students) to understand the material or assignments from the teacher well. Thus, the writing of this undergraduate thesis emphasizes the importance of good cooperation for stakeholders in the world of education for the progress of the children of Indonesia.
