Penerapan sistem ekonomi tersebut dilakukan secara diam-diam oleh pemerintah dan kaum kapitalis, yang sudah di mulai sejak masa pemerintahan Soeharto di era orde baru. Pada masa itu, para investor asing diizinkan untuk melakukan investasi di Indonesia. Hal tersebut dilakukan atas nama pembangunan ekonomi negara Indonesia, yang pada saat itu sedang tidak stabil. Namun, secara perlahan akibat sistem ekonomi yang dibawa masuk oleh para investor tersebut mampu menguasai sistem perekonomian Indonesia yang berlandaskan Pancasila.

Berdasarkan penelitian yang telah dilakukan, hegemoni sistem ekonomi kapitalisme neoliberal di Indonesia, ternyata mempengaruhi penerapan nilai-nilai pancasila, khususnya pada sila keadilan sosial bagi seluruh rakyat Indonesia. penelitian ini membuktikan bahwa kapitalisme neoliberal, lebih mengutamakan kepentingan kaum kapital. Sehingga dengan hal ini, para kapitalis yang telah menguasai sistem perekonomian Indonesia, selalu berorientasi pada pengejaran laba untuk kepentingan mereka sendiri. Hal ini berimplikasi pada kesenjangan sosial yakni adanya disparitas antara kaum elit kapitalis dan rakyat miskin. Dengan demikian keadilan sosial bagi seluruh rakyat Indonesia, yang menjadi salah satu cita-cita bangsa Indonesia, menjadi tidak terwujud akibat penerapan sistem ekonomi kapitalisme neoliberal tersebut.

The implementation of this Economic System was carried out secretly by the Government and Capitalists, which had started since the Soeharto's government in the New Order era. At that time, foreign investors were allowed to invest in Indonesia. This was done in the name of Indonesia's economic development, which at that time was not stable. However, slowly as a result of the economic system brought in by these investors they were able to master the Indonesian economic system which is based on Pancasila.

In writing this scientific work, the author uses a descriptive-qualitative approach. Based on the research that has been done, the Hegemony of the Neoliberal Capitalist Economic System in Indonesia has in fact influenced the application of Pancasila values, especially the precepts of social justice for all Indonesian people. This research proves that Neoliberal Capitalism prioritizes the interests of Capitalists. So with this, the Capitalists who have mastered the Indonesian economic system, are always oriented towards the pursuit of profit for their own interests. This has implications for social inequality, namely the existence of disparities between the Capitalist Elite and the Poor. Thus Social Justice for all Indonesian People, which is one of the ideals of the Indonesian Country, is not realized as a result of the implementation of the Neoliberal Capitalist Economic System.

Key words: Neoliberal Capitalism, Social Justice, and the Indonesian People.
