

ABSTRAK

Faustus Efendi Miki. 21.75.7047. **Partisipasi Umat KBG Santo Lukas Waso Golo dalam Program GESSHAR di Paroki Santa Maria Assumpta dan Santo Yosef Katedral Ruteng**. Skripsi. Program Sarjana. Program Studi Ilmu Filsafat, Institut Filsafat dan Teknologi Kreatif Ledalero. 2025.

Penelitian ini bertujuan untuk menjelaskan apa itu Program GESSHAR, menggambarkan Paroki Katedral Ruteng dan KBG Santo Lukas Waso Golo, menganalisis tingkat partisipasi umat KBG Santo Lukas Waso Golo dalam Program GESSHAR. Selain itu, penelitian ini mengidentifikasi hambatan yang mempengaruhi keterlibatan umat serta mengeksplorasi strategi untuk meningkatkan partisipasi umat dalam Program GESSHAR di Paroki Santa Maria Assumpta dan Santo Yosef Katedral Ruteng.

Metode yang digunakan dalam penelitian ini adalah metode kualitatif dan kuantitatif. Objek yang diteliti adalah partisipasi umat KBG Santo Lukas Waso Golo dalam program GESSHAR di Paroki Santa Maria Assumpta dan Santo Yosef Katedral Ruteng. Sumber data dalam penelitian ini diperoleh peneliti dari responden dan beberapa narasumber kunci melalui metode kuesioner dan wawancara. Selain itu, ada juga data dan informasi dari kamus, jurnal, buku, ensiklopedia, skripsi, artikel-artikel tentang kehidupan pastoral, dan dokumen-dokumen yang tersedia di kantor sekretariat Paroki Santa Maria Assumpta dan Santo Yosef Katedral Ruteng, terutama yang berkaitan dengan program GESSHAR. Setelah data dikumpulkan, peneliti membuat analisis data untuk menjawab rumusan masalah.

Hasil penelitian menunjukkan bahwa partisipasi umat KBG Santo Lukas Waso Golo dalam program GESSHAR di Paroki Santa Maria Assumpta dan Santo Yosef Katedral Ruteng masih tergolong “kurang aktif” hingga “cukup aktif”. Selama periode 2019-2024, terdapat ketidaksesuaian yang konsisten antara target dan realisasi pemasukan dana GESSHAR, di mana jumlah pemasukan selalu berada jauh di bawah target tahunan. Faktor-faktor utama yang berkontribusi terhadap rendahnya partisipasi ini mencakup kondisi ekonomi umat yang belum mapan, minimnya sosialisasi program GESSHAR dari pengurus paroki maupun KBG, ketidakbiasaan terhadap mekanisme pengumpulan dana dengan metode program GESSHAR, serta adanya protes dan kecurigaan dari beberapa umat maupun pengurus paroki terhadap program tersebut. Lalu, ada lima strategi utama yang dapat diterapkan untuk meningkatkan partisipasi umat dalam program GESSHAR, yaitu peningkatan akuntabilitas dalam pengelolaan dana paroki, optimalisasi sosialisasi program, perlakuan khusus bagi umat yang mengalami kesulitan ekonomi, tetap memastikan pelayanan sakramen bagi seluruh umat tanpa diskriminasi, serta mempertahankan prosedur pengumpulan dana yang praktis dan transparan. Dengan penerapan langkah-langkah tersebut, diharapkan program GESSHAR dapat berjalan lebih efektif, sehingga kesadaran dan keterlibatan umat, khususnya umat KBG Santo Lukas Waso Golo, semakin meningkat dalam upaya mencapai kemandirian dan keberlanjutan Paroki Katedral Ruteng.

Kata kunci: Program GESSHAR, Partisipasi Umat, Paroki Katedral Ruteng, KBG Santo Lukas Waso Golo.

ABSTRACT

Faustus Efendi Miki. 21.75.7047. **Participation of the Congregation of the Basic Ecclesial Communities (BEC) of Saint Luke Waso Golo in the GESSHAR Program at the Parish of Santa Maria Assumpta and Saint Joseph of Cathedral Ruteng.** Thesis. Undergraduate. Philosophy Study Program, Ledalero Institute of Philosophy and Creative Technology. 2025.

This study aims to explain what the GESSHAR Program is, describing the Ruteng Cathedral Parish and BEC of Santo Lukas Waso Golo, analyzing the level of participation of the congregation of the BEC of Saint Luke Waso Golo in the GESSHAR Program. In addition, this study identifies barriers that affect the involvement of the congregation and explores strategies to increase the participation of the congregation in the GESSHAR Program at the Parish of Santa Maria Assumpta and Saint Joseph of the Ruteng Cathedral.

The methods used in this study are qualitative and quantitative methods. The object of the study was the participation of the congregation of the BEC of Saint Luke Waso Golo in the GESSHAR program at the Parish of Santa Maria Assumpta and Saint Joseph of Ruteng Cathedral. The data sources in this study were obtained by researchers from respondents and several key sources through questionnaire and interview methods. In addition, there are also data and information from dictionaries, journals, books, encyclopedias, theses, articles on pastoral life, and documents available at the secretariat offices of the Parish of Santa Maria Assumpta and Saint Joseph of Ruteng Cathedral, especially those related to the GESSHAR program. After the data is collected, the researcher makes a data analysis to answer the formulation of the problem.

The results of the study show that the participation of the congregation of the BEC of Saint Luke Waso Golo in the GESSHAR program at the Parish of Santa Maria Assumpta and Saint Joseph of Ruteng Cathedral is still classified as "less active" to "quite active". During the 2019-2024 period, there was a consistent mismatch between the target and the realization of GESSHAR fund revenues, where the amount of income was always well below the annual target. The main factors that contribute to this low participation include the economic condition of the unestablished community, the lack of socialization of the GESSHAR program from parish and BEC administrators, the unusual mechanism of fundraising with the GESSHAR program method, as well as the protests and suspicions of some congregation and parish administrators towards the program. Then, there are five main strategies that can be applied to increase the participation of the congregation in the GESSHAR program, namely increasing accountability in the management of parish funds, optimizing the socialization of the program, special treatment for people experiencing economic difficulties, ensuring sacrament services for all people without discrimination, and maintaining practical and transparent fundraising procedures. With the implementation of these measures, it is hoped that the GESSHAR program can run more effectively, so that the awareness and involvement of the congregation, especially the faithful of the BEC of Saint Luke Waso Golo, will increase in an effort to achieve independence and sustainability of Ruteng Cathedral Parish.

Keywords: GESSHAR Program, Congregation's Participation, Ruteng Cathedral Parish, The BEC of Saint Luke Waso Golo.
